Timing for snow onset

Expected Impacts

Timing: **Snow** will develop by early afternoon across southwestern Indiana and by mid to late afternoon across north-central Kentucky. Rain will change to snow by mid evening across central and east-central Kentucky. The heaviest snow will fall from mid afternoon to mid evening with a diminishing trend after midnight.

Road Impacts: Snow is expected to accumulate on roadways by mid afternoon as temperatures fall into the lower 30s across Indiana and northern Kentucky. This will result in negative travel impacts for this evening's commute in the metro areas of Louisville & Lexington. Negative travel impacts will become more likely across southern Kentucky this evening. Travel conditions are expected to remain hazardous overnight through early Saturday morning.

Stay Weather Aware!

- The heaviest snow will fall generally from 3PM EST this afternoon through 10 PM EST this evening. Snow may become heavy for a period late this afternoon...significantly reducing visibilities. This snow will really affect this evening's commute home from work and school in southern Indiana and northern Kentucky.
- Allow yourself flexibility with your travel plans for this afternoon and evening. Give yourself *plenty of time* to reach your destination.
